[Portfolio](#)

Dedicated Backend Developer with 3+ years of experience specializing in Golang, MySQL. Proven ability in designing databases, solving complex issues, and deploying applications on Server. Proficient in project management tools such as Jira, Trello, and GitHub. Strong problem-solving skills and a collaborative mindset.

EXPERIENCE

Sword Software N Technologies Pvt Ltd, New Delhi

Software Engineer

NinjaCRM V2 (ICICI Lombard)

Sep 2022–Feb 2024

- Enhanced application performance by implementing Redis caching, optimizing SQL queries, and restructuring APIs and business logic, resulting in improved response times and system efficiency.
- Developed and managed Golang cron jobs, implemented AWS SQS for messaging and S3 for storage, and monitored the entire application workflow, ensuring accurate tracking and efficient background task processing.
- Configured and deployed on AWS Ubuntu systems, implemented encryption and decryption protocols in collaboration with frontend teams, and redesigned the login method and workflow for enhanced security and user experience.
- Successfully managed the entire application during a 20-day absence of the Product Owner, effectively communicating with business, technical, and infra teams to fix all bugs and address any arising issues, ensuring seamless project continuity and stability.

TR2GH

- Developed a robust script to migrate Trello boards to GitHub boards while preserving the sequence numbers, ensuring seamless transition of project tasks and maintaining organizational structure.
- Implemented rate limit handling mechanisms within the script to manage GitHub API requests effectively, preventing disruptions and ensuring uninterrupted migration of tasks with optimal efficiency.

Cloud Manager (Stackuno)

Full Stack Developer

Feb 2024–Present

- Developed a Golang-based system to manage server-level processes like live terminal access, file/database management, and integrated phpMyAdmin securely through custom services.
- Automated deployment and provisioning workflows for Laravel and WordPress apps with configuration backups, restore options, and User-based isolation.
- Implemented key security features including ModSecurity (OWASP CRS), passkeys (WebAuthn), 2FA (TOTP, Email OTP), and password policy enforcement.
- Introduced file quota limits, server resource monitoring (CPU, RAM, disk), and user-level RBAC with detailed audit logging.
- Collaborated across Golang (backend services), Laravel (APIs), and React (frontend) to deliver a scalable and secure cloud management platform.

EDUCATION

CHAUDHARY CHARAN SINGH UNIVERSITY, MEERUT

2020-2022

- Master of Science in Computer Science,
- Bachelor of Science in Computer Science,

2017-2020

ADDITIONAL SKILLS

- Programming Languages:** Golang, React, PHP(with Laravel)
- Version Control Systems:** Git, GitHub, Bitbucket
- Cloud Services:** AWS SQS, AWS S3
- Database Technologies:** MySQL, SQLITE3, Redis Cache
- Web Frameworks/Libraries:** Gin, Echo, Gorm, Beego/orm, Microservices
- Operating Systems:** Windows, macOS, Ubuntu
